📖 README.md

# MPPlot

---

**Don't use it in prodcuton, was created during an hackathon**

Create iOS native Graphs easily , fast and customizable...

## Usage

To run the example project, clone the repo, and run `pod install` from the Example directory first.

## Requirements

## Installation

MPPlot is available through [CocoaPods](#). To install it, simply add the following line to your Podfile:

```
pod "MPPlot"
```

## Author

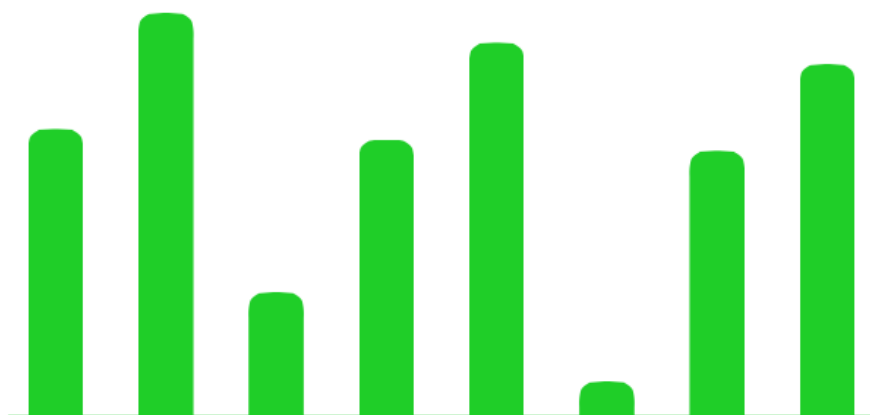

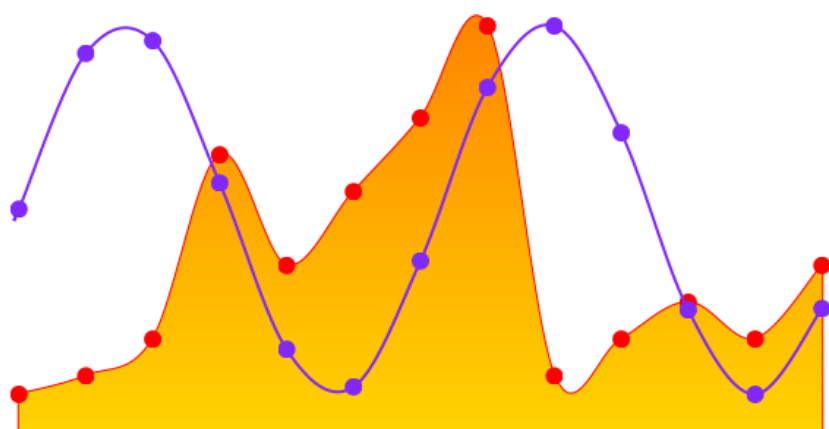

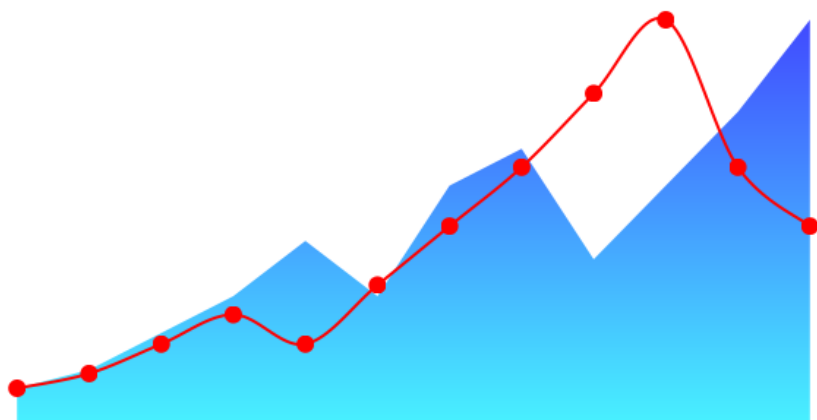

Alex Manzella, [manzopower@icloud.com](mailto:manzopower@icloud.com)

## License

MPPlot is available under the BSD license. See the LICENSE file for more info.
