## Xcode7.3启动图片的设置

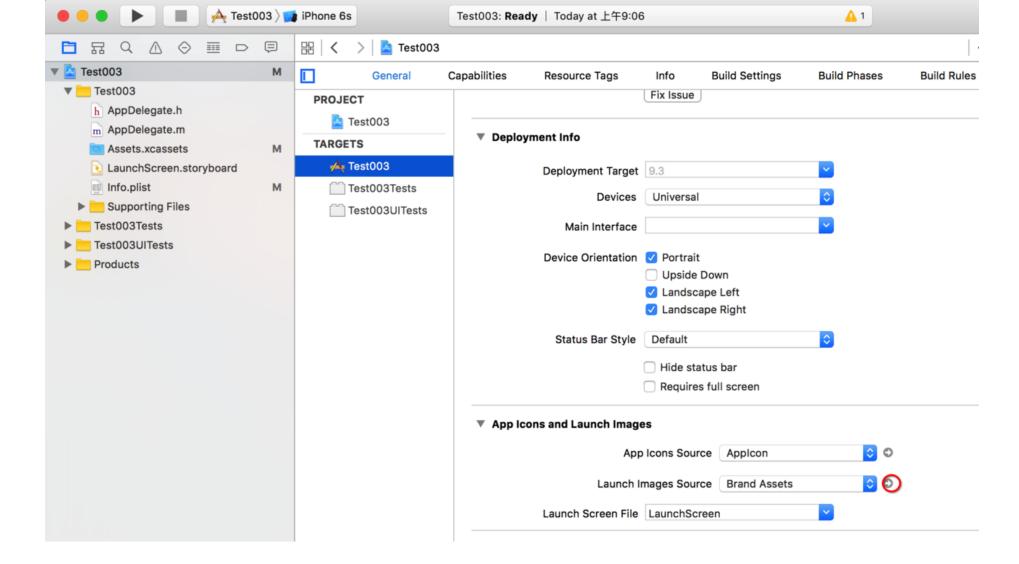

打开工程点击TARGETS---->General找到 App Icons and Images中的Launch Images Source点击 Use AssetCatalog如图所示

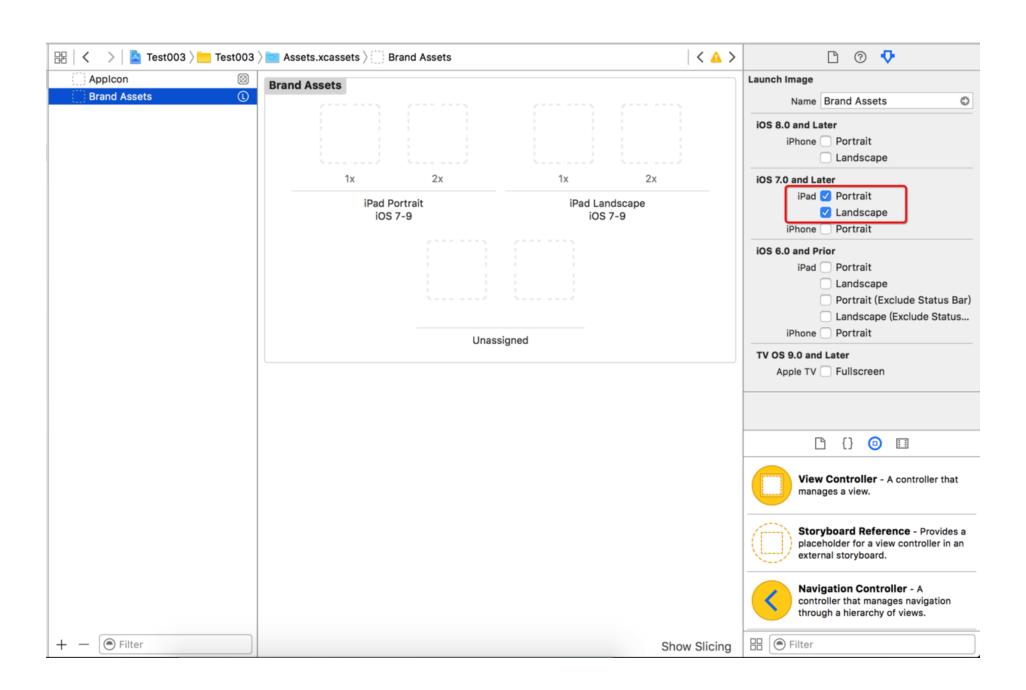

点击Use AssetCatalog后会跳出下图所示

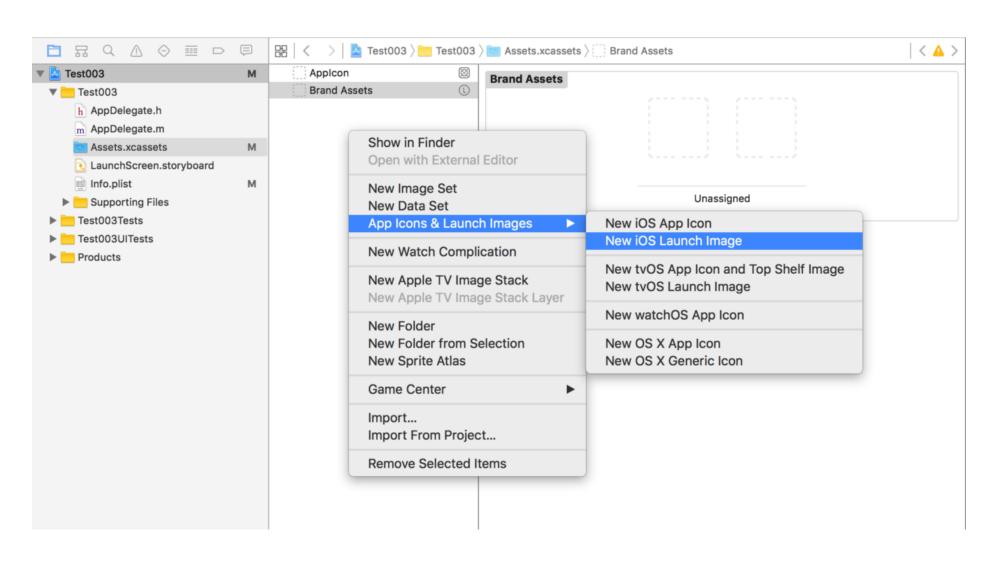

点击Migrate,然后在Launch Images Source 右侧会生成一个灰色的箭头

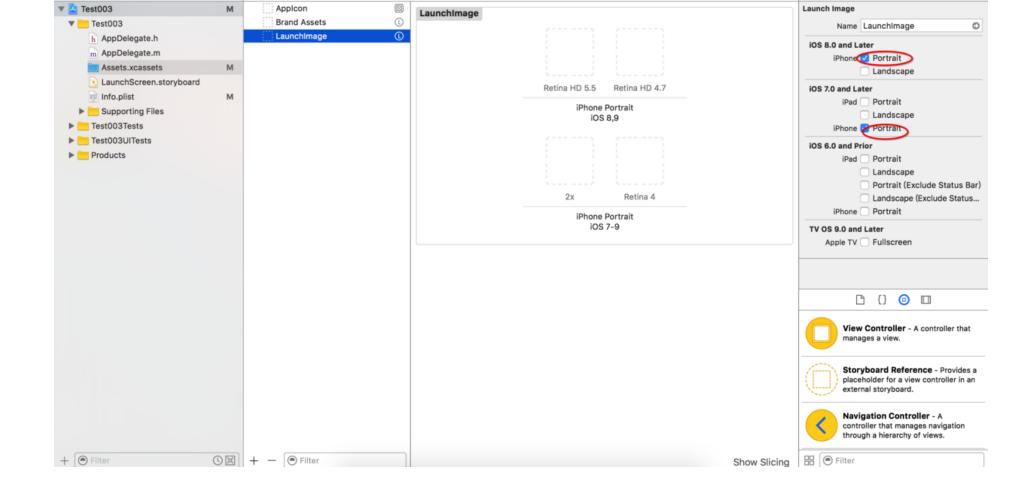

点击Launch Images Source右侧的灰色箭头进入一个下图所示界面,然后取消掉图中红色 区域所勾选的选项

然后如下图操作在Assets.xcassets新建一个LaunchImage

接着在Xcode最右侧选择启动图去适配哪些iOS设配,我选择iOS 7.0 以后的设备,如下图红色区域所勾选的部分

然后在对应位置中拖入相应的图片,对应位置应该拖入的图片大小如下:

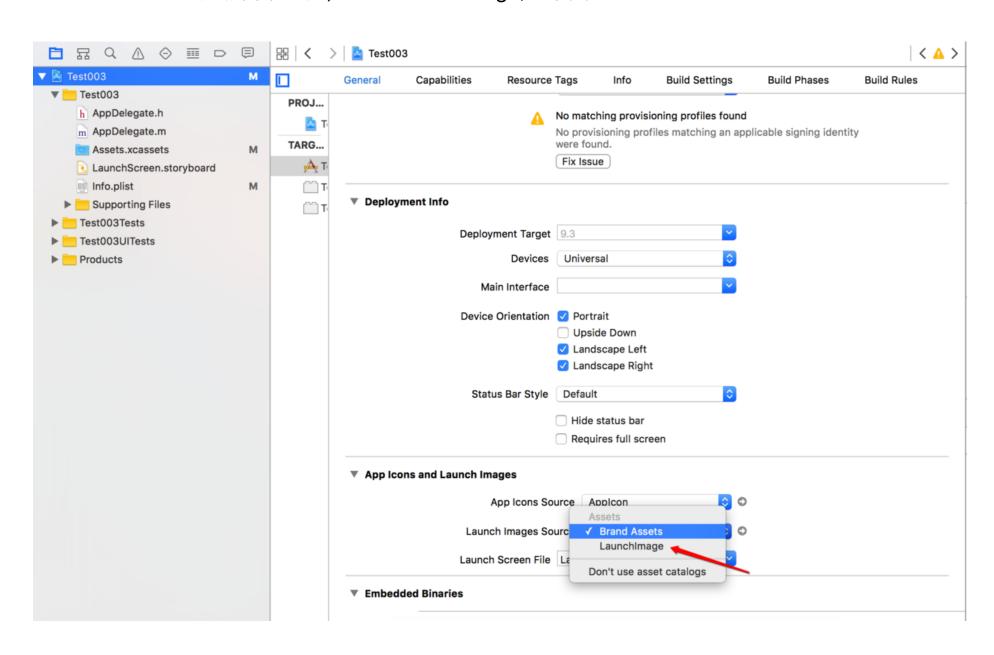

R5.5 (6+) 1242\*2208

R4.7 (6) 750\*1334

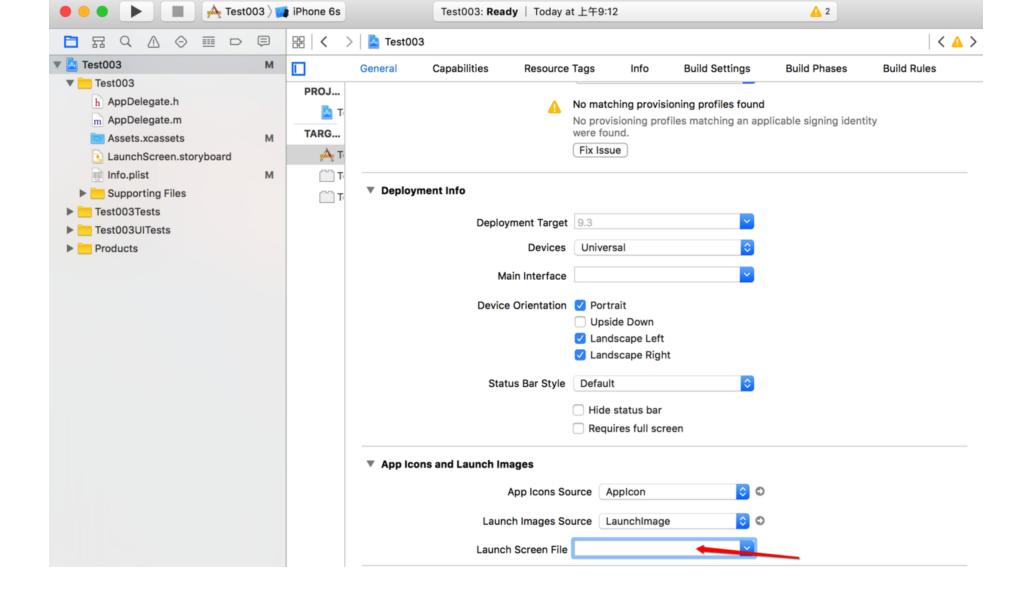

2X (4/4s) 640\*960

R4 (5/5s/5c) 640\*1136

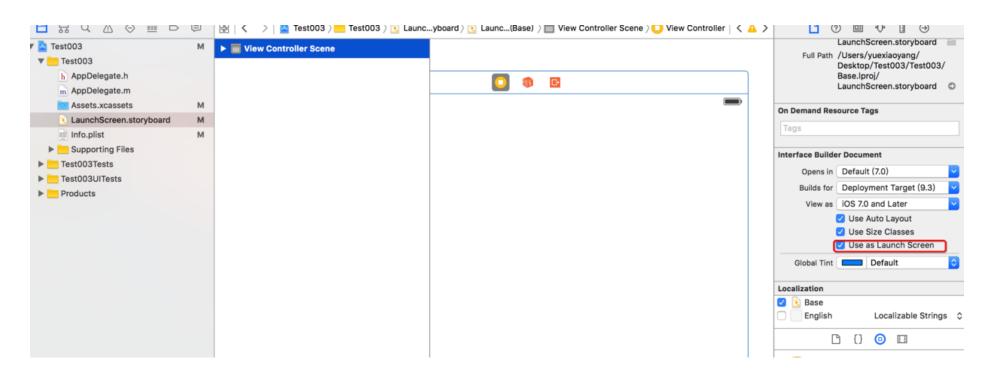

然后再回到TARGETS---->General找到 App Icons and Images中的Launch Images Source这一栏点击下拉框,选择LaunchImage,如下图

接着把下面的Launch Screen File 这一栏清空,如下图所示

最后在工程中找到LaunchScreen.Storyboard,把下图最右侧红色区域所勾选的选项取消 勾选

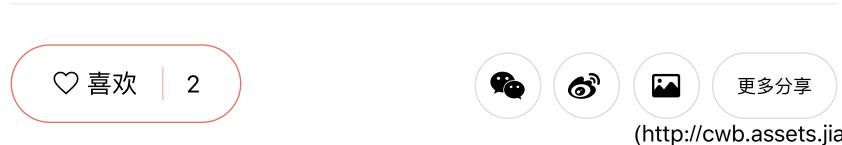

注:如果程序启动时发现没有效果,可以把应用删除掉重新启动下试试.
